(54) Title: A NEW SILAGE AID, PROCESS FOR PREPARING THIS SILAGE AID AND USE OF THIS SILAGE AID

(57) Abstract

This invention relates to a new silage aid, process for preparation of this silage aid and use of the silage aid. The silage aid comprises at least one antioxidant selected from the group 2,6-di-*tert*-butyl-4-methylphenol (BHT), 3-*tert*-butyl-4-hydroxyanisole (BHA), *tert*-butylhydroquinone (TBHQ), tocopherol and gallates; at least one short chain carboxylic acid; and optionally at least one salt of said acid. These antioxidants are food approved. The present silage aid is useful for preservation of organic by-products, and particularly for protection of fish oil during a fish silage process.
